EXPERIENCE

Sessions, Remote — *Software Engineer*

AUGUST 2022 - DECEMBER 2022

- Designed and built new features using React, React Native, Typescript, and MobX State Tree.
- Worked with Xcode and Android Studio to create additional features and contributed to bug fixes for the mobile app.
- Collaborated with the team to build and ship the Next Music platform from scratch using Next.js, MobX State Tree, and Chakra UI in six weeks

Breathing.ai, Remote — *Front-End Engineer*

MARCH 2021 - MARCH 2022

- Took the lead on the initial website codebase and improved the Lighthouse score by 20 points which resulted in an increase of page views by 400% over the span of a year.
- Enhanced website user accessibility to a broader audience by incorporating Spanish localization using i18next.
- Implemented the functionality to add, update, or delete blog posts using Contentful CMS which opened the door for non-technical members to make website changes.

Piicked, San Francisco — *Front-End Engineer*

JUNE 2019 - JUNE 2020

- Created the Piicked landing page from scratch using React and contributed to building the desktop version of the Piicked mobile app.
- Collaborated with designers to create clean interfaces and simple, intuitive user interactions and experiences.

EDUCATION

EPICODUS — FULL-STACK DEVELOPMENT

Intensive 6-month program. Clocked 1,000+ hours of classroom and internship development work.

UNIVERSITY OF CALIFORNIA, DAVIS — *B.A. IN FILM*

SKILLS

React, React Native, Next.js, MobX State Tree, Chakra UI, Git, Netlify, Vercel, RESTful API, SASS, HTML5, CSS3

PROJECTS

ONLINE MOVIE DATABASE

A snappy single-page application to find details on your favorite movies, shows, and cast. Built using React and utilizes The Movie Database (TMDB) API.

SMART BRAIN

A full-stack app that detects people's faces in the image you upload.

Front-end: React

Back-end: Node.js, Express.js, PostgreSQL

BURGER BUILDER

Build a custom burger easily using the Burger Building Machine Interface. Order your delicious burger and access all your previous orders.

Created using React, React-Router, Redux, and Firebase.
